

'E-safety'!

at Barrow School

Children may use the internet for a variety of reasons; for research, online games or even instant messenger. In school, we regularly talk to the children about potential dangers of the internet including topics such as; is everyone on the internet a friend and can we be sure who else is using that website, game or chat with us? We discuss the importance of never giving out personal information over the internet, even if we think we know the person we are communicating with. In school, the children only access websites and APPS that the teachers have asked the children to use.. However, if the children come across something they are unsure of or do not trust, we have our friend HECTOR the dolphin who helps to keep us safe! Hector is always visible on the screen and just by clicking on him, he'll look after the screen and tell the children what to do to be safe!

Staying safe in school is EASY as **PIE!**

How can parents get involved?

To keep up-to-date with the latest cyber changes, there is an excellent website hosted by the NSPCC called NSPCC NetAware. You can access it at www.net-aware.org.uk. This is a great site for parents to find out everything they need to know about the sites their children might be starting to take an interest in.

Always ask your child about SAFETY PIE, especially the importance of E-safety and how Hector is always there to help if we are unsure of something we see online or if we feel unsafe at any point when we're online.
